## Kursbeschreibung

To build a solid theoretical basis, the training begins with the PRINCE2® Foundation. Recognised and applied around the world, the PRINCE2® method for managing projects stands out for its structured approach and its clearly defined roles. Combining stability with flexibility, it allows teams in every industry to manage projects effectively, whatever the project environment.

Learning objectives of this training

Understand PRINCE2® and use it in a project environment, covering roles and responsibilities as well as the different management products

Bring agile values and principles into the scaling process to secure flexibility, collaboration and continuous improvement

Get the most out of your working day by putting the techniques you have learned for self-organization, time management and stress management into practice

Explain and work with Excel functions such as data calculations, visualisations and pivot tables

Get to grips with what MS Project 2016 offers in terms of basic functions and controls, and use them in practice

**02**

## Lehrplan & Module

### 1. PRINCE2® Foundation

A structured way of planning, executing and controlling projects effectively, centred on a clear project organization, the handling of risks and changes, and ongoing tracking of how the project is progressing

### 2. Insights into agile values and techniques

Methods connected to the topics, processes, roles and management products of PRINCE2®

### 3. Time-management principles

Self-organization, time management and stress management techniques  
Efficient ways of dealing with emails

#### **4. Microsoft Office Excel 2019 and 365**

Core spreadsheet functions  
Performing calculations  
Applying formatting  
Working across multiple sheets  
Creating charts and more

#### **5. MS Project 2016**

Program and project settings management  
Setting up WBS codes  
Building individual calendars  
Working with tables efficiently

03
